What is STATcube?

STATcube is the statistical database system of Statistics Austria — a contemporary product characterised by a user-friendly interface. It enables you to conduct data analyses and create data reports online in different formats according to your requirements. STATcube is available online at www.statcube.com.

What is a data cube?

Data cube is a term frequently used for the description of data in a logical structure. Data are arranged as elements of a multi-dimensional cube. These cube dimensions connect the data and thereby provide easy access.

Which data does STATcube provide?

STATcube covers the whole range of official statistics, including the topics

People & Society

- Dwellings, buildings
- Education, culture
- Health
- Labour market
- Population
- Social statistics

Economy

- Agriculture and forestry
- Enterprises
- Foreign trade
- Manufacturing and services
- National Accounts

- Prices
- Public finance, taxes
- Tourism

Energy, Environment, Innovation, Mobility

- Energy, environment
- Research and Development
- Transport

Examples

...for population data:

- How has the number of over 75 year old women developed in the district of Mattersburg since 2002?
- How many lone fathers will there be in 2060?
- In which Austrian federal state do the most people born in South America live?
- Where in Austria was the highest number of twin births registered last year?
- How many couples with the wife older than the husband by more than ten years have married in 1980?

...for economic data:

- Which Austrian federal state had the highest gross regional product in 2004?
- How did the consumer prices for books, fruit or rents develop in the last two years?
- How many Finnish guests spent holidays in Carinthia last year?
- Did Tyrol have more overnight visitors in the winter or summer season 1975?
- Where in Austria are the most campsites, operated mountain shelters, or 5/4–star hotels?

Why a subscription?

A subscription provides access to more detailed data and additional features not available with the free guest access. As a subscriber, you will also be able to store queries on your computer as you may want to process them again later on.

Guest access can be used to assess whether the purchase of a subscription is worthwhile. The database includes features which can only be fully accessed by subscribers (labelled with the tag [partly ABO]) and other features only accessible to subscribers (labelled with the tag [ABO]; see chart). Please note: the abbreviation “ABO” stands for the German translation of the term “subscription”.

✓ 2014

Demographic Characteristics

- Sex <2> [3] >
- Age <14> [partly ABO] ⓘ [3] >
- Educational attainment - highest completed level
- Educational attainment - highest completed level
- Educational attainment - highest completed level

- Foreign background <3> [partly ABO] ⓘ [3] >
- Duration of residence in Austria <7> [ABO] [8] [
- Marital status <4> ⓘ [6] >

Types of subscription and prices

You can choose between three different subscription options:

14 days subscription

Validity of 14 days (starting with the day when subscription is activated) and 100.000 values

Price: € 50,-

3 month subscription

Validity of 92 days (starting with the day when subscription is activated) and 1.5 million values

Price: € 250,-

12 month subscription

Validity of 366 days (starting with the day when subscription is activated) and 6 million values

Price: € 800,-

Ordering and payment

On www.statcube.com /Subscription/ Order you will find the order form. Additionally, a PDF document titled “4 easy steps to subscribe” is available in the subdirectory “subscription”. This document assists you with a step by step guide on how to subscribe.

We offer payment by credit cards and bank transfer.

Activating and validity

After the purchase of a subscription you will receive the activation key per email. To activate the subscription you have to

redeem the activation key from the email of the respective subscription within one year.

During the period of validity you may access STATcube as often as you want, according to the time and quantitative consumption restrictions included in the conditions of use.

The STATcube initial screen will keep you informed about subscription validity and consumption (in percent of your contingent). Before your subscription expires you will be reminded by e-mail, and additionally, the STATcube initial screen will refer to it in the column “validity”.

Renewal of a subscription

The subscription will not be renewed automatically. As soon as your current subscription is about to expire you will be informed, in order to allow you a timely purchase and activation of a new subscription.

Residual data quantities in case of expired subscriptions

If you wish to extend your subscription, please pay attention:

- If you activate the newly purchased subscription while your old subscription is still valid, a potentially remaining residual data quantity will be transferred to the new subscription.
- If you activate the newly purchased subscription after the old one has expired, the residual data quantity of the expired subscription is lost.

Support

On www.statcube.com further information and support regarding the following topics is provided:

- **Help, FAQs, Contact** — important notes on the use of STATcube, system requirements, FAQs (Frequently asked questions) and technical support
- **Subscription** — client information on STATcube, conditions of use, online order form, PDF document “4 easy steps to subscribe”, link to registration (after having successfully purchased a subscription)
